

MARKING TOOLS

▶ YAMAKI-PEN SCRATCH MARKING TOOL -S12

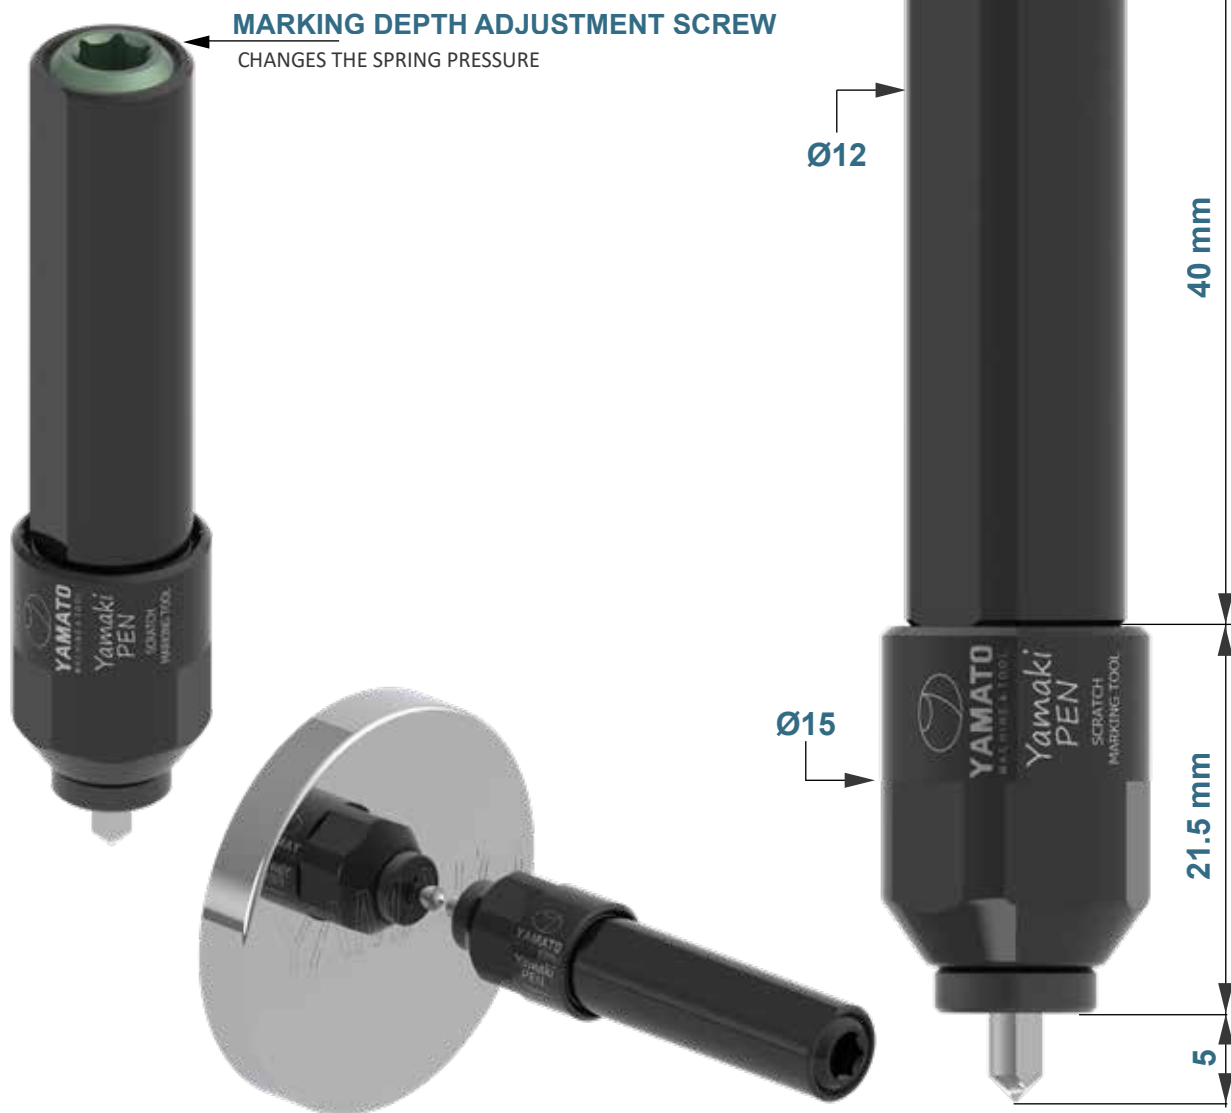

**SMALLEST MARKING TOOL
12mm SHANK**

- ▶ Integrated, automatic distance compensation up to approx. 6 mm (regular marking depth also of uneven marking surfaces)
- ▶ Marking depth individually adjustable via adjusting screw
- ▶ Extremely high resistance to wear of the hard metal marking needle needles are simple to replace with just a few manual operations
- ▶ Can be used for almost all machinable materials (hardness of marking surface up to approx. 62 HRC)
- ▶ Very short marking time
- ▶ Feed speed more than 5'000 mm/min possible
- ▶ Extremely high degree of process safety due to single, spring-mounted, pre-tensioned marking needle
- ▶ For universal use (Weldon shank shaft with a diameter of 12 mm)

MARKING TOOLS

YAMAKI-PEN SCRATCH MARKING TOOL -S12

Use in machining centres, automatic lathes, etc. (no additional installations required)

Extremely easily adjustable tool (without requiring a needle drive)

Very compact construction with 12 mm Weldon shank

Individual rather fine markings of any workpieces
with regular, uneven or rough surfaces.
